Round Four

- 19-0-5 applied at 2.63 lb/M
- Change Up Herbicide applied at 2.5 pints/acre (as needed)

Round Five

- 19-0-5 applied at 2.63 lb/M
- Change Up Herbicide applied at 2.5 pints/acre (as needed)

From TruGreen: This is an approximate timeline in that we always plan to start on April 1st and usually do, but more often than not a late snow or spring rains then pushes us out by several weeks so we may end up in the 2nd set of dates. The idea is we do the application in one of the 21 day timeframes listed in parentheses. Because the schedule often gets delayed due to our climate, we provide 2 different 21 day timeframes we plan to do the application. Because we can't provide a seasonal schedule, we also email the notifications as much as 2 weeks in advance for your planning purposes.

Line Item Description	Round Description	Round #
